Tier 1 Roofer Retention

Closing the service gaps that cost us customers

Leadership Review | October 2026

Executive Summary

Situation	Henry wins Tier 1 roofers on product quality, Henry-provided leads and competitive pricing.
Problem	We lose their business through five recurring service issues. Every one of them is within our control.
Recommendation	Adopt four service standards, approve the corrective actions in this deck, and assign an owner to each issue.

Five Issues at a Glance

#	Issue	What customers report	Status
1	**Customer Service**	Difficult to deal with: cumbersome ordering, slow answers	At Risk
2	**Warranty**	Sign-offs and claim responses take too long	At Risk
3	**Logistics**	Deliveries are unreliable and arrive without notice	Critical
4	**Material Availability**	Accessories are not ready to ship within 48 hours	At Risk
5	**National Account Leads**	Our leads close well, but there are not enough of them	Watch

Status reflects the team's own assessment of each area.

Example: How a Single Order Goes Wrong

A composite of actual customer feedback

Step	What the customer does	What happens at Henry	Issue
1. Order	Orders “24 drums of white silicone.”	We send a 200-SKU list and ask for the SAP number.	1
2. Inquiry	Asks a question about the order.	The answer takes more than 24 hours.	1
3. Stock-out	Needs PG988; Kingman is out.	Carson has it, but no one offers to ship from there.	1
4. Shipment	Expects delivery on the agreed date.	We ship early without notice. No one is on site.	3
5. Delivery	Receives the coating.	The primer is missing, so the job cannot start.	4

Result: the roofer looks bad in front of the building owner, and so does Henry.

Customer Service Is Hard to Work With

Issue 1 of 5

At Risk

What Customers Report

- Customers order “24 drums of white silicone” and we ask for the SAP number.
- Inquiries can wait more than 24 hours for a response.
- We will not substitute products, ship from another plant, or expedite.

Recommended Actions

- Take orders as written; call the customer if unclear.
- Respond to every email within 4 hours.
- Give CS visibility into inventory at all plants.
- Train staff on approved product substitutions.
- Hold people accountable for service.

Warranty Response Is Too Slow

Issue 2 of 5

At Risk

What Customers Report

- Building owners expect action on a claim within 24 hours.
- Our claim responses do not meet that expectation.
- Some manufacturers sign off on warranties without walking the site.

Recommended Actions

- Acknowledge every claim by email within 4 hours.
- Complete a site visit within 4 days.
- Sign off promptly, and walk the roof within the 2-year window while the roofer is responsible for leaks.
- Batch sign-offs 3+ hours from base to reduce travel cost.

Deliveries Are Unreliable

Issue 3 of 5

Critical

What Customers Report

- Material arrives days or a week early with no one there to accept it.
- No delivery notice or tracking is provided.
- If we can ship early, we do so without asking the customer.
- It makes the roofer look bad and makes Henry and Carlisle look unprofessional.

Recommended Actions

- Notify the customer and get approval before shipping early.
- Place trackers on pallets and share tracking.
- CS provides daily updates without being asked.
- Move roofers to distribution and determine how to honor their pricing.

Accessories Are Not Ready to Ship

Issue 4 of 5

At Risk

What Customers Report

- We can have trucks of 988, but without primer the job cannot start.
- Accessories (primer, bleed blockers, mastics) are not reliably on hand. This is a long-standing issue.
- System gaps: no sprayable seam sealer for silicone; no cementitious coating for Arizona.

Recommended Actions

- Raise minimum stock levels for accessories.
- Increase production ahead of known storms and weather.
- Have all job-start material ready to ship within 48 hours.
- Assign an owner to close the product gaps.

Lead Quality Is Strong; Volume Is Low

Issue 5 of 5

Watch

What Customers Report

- National account leads close at a high rate; Facebook and website leads often do not.
- Sherwin-Williams provides more leads through its paint contracts.
- Some manufacturers offer contractors discounted thermal moisture surveys.

Recommended Actions

- Collaborate with other Henry divisions on leads.
- Free the national accounts team from firefighting and CS work so it can generate leads.
- Moisture surveys: John T Hull.

Strengths to Protect

These are the reasons roofers choose Henry. The corrective actions must not put them at risk.

Strength	Why it matters
Core products	Silicone and SPF lead on quality and price.
Leads that close	National account leads close at a high rate.
Flexibility on specifications	Where other manufacturers require less, we remain willing to flex on scope and specifications.
Few failures	A single failure ends future work with a building owner. We must keep innovating.

Proposed Service Standards

Standard	Commitment	Addresses
4 hours	Respond to every email and acknowledge every warranty claim	Issues 1, 2
4 days	Complete a site visit on every warranty claim	Issue 2
48 hours	Have material ready to ship, accessories included	Issue 4
Daily	Proactive order updates from CS until delivery	Issue 3

Decisions Requested Today

Approve the corrective actions, assign an owner to each issue, and review progress monthly.

Issue	Key action	Measure	Owner
1. Customer Service	4-hour response; inventory visibility	Response time	_____
2. Warranty	4-hour acknowledgement; 4-day visit	Claim response	_____
3. Logistics	Advance notice; tracking; daily updates	On-time deliveries	_____
4. Material	Accessories ready in 48 hours	48-hour readiness	_____
5. Leads	Division partnerships; team time	Leads delivered	_____

Appendix: Detailed Assessment by Area

Product Quality — Strength

- Silicone
- SPF
- Acrylic
- Acrylic clumping
- Seam treatments
- Urethane system

Availability — Watch

- Silicone
- Accessories
- Acrylic
- Primers and bleed blockers

Leads and Pricing — Strength

- Henry-provided leads
- Silicone price
- Acrylic price
- SPF price
- Emulsion price

Logistics — At Risk

- Tracking information
- On-time delivery
- Delivered undamaged

Customer Service — At Risk

- We ask for SKU numbers
- We ask for our form
- Tracking without asking
- Keeping jobs on schedule
- Attitude
- Reps reachable by email

Warranty — Watch

- Means something to owners
- Claim process
- Ease of processing
- Flexibility on standard spec
